Appendix F: Environmental Policy Statement

JJ Churchill Ltd understands its responsibilities to the local and global environment in relation to its business activities. JJ Churchill Limited is committed to managing its business successfully while minimising the impact to the environment.

JJ Churchill understands the issues the business, economy and society will face in the future as climate effects changes the ways of business. It is committed to mitigating the effects of climate change from its own business activities and where possible contribute to the global fight against climate change effects.

Ways in which we plan to do this include:

- **Minimise resource use,** by examining resource streams and looking for efficiencies. We currently track energy usage and utilise trend identification to improve efficiencies.
- **Minimising waste and promoting recycling**. The Company has an active policy to reduce, re-use and recycle and has recently eliminated waste to landfill.
- **Meeting or exceeding environmental legislation.** The company is committed to legislative compliance as a minimum and has an established Environmental Management System in place that conforms to ISO 14001.
- **Adapting to technical progress.** In order to reduce its environmental impacts e.g. L.E.D Lighting switchover program in place.
- **Control pollution.** Using reduce, reuse and recycle principles, technological advances and careful resource management.

Furthermore, the company has committed to the **SME Climate Commitment** who recognise that climate change poses a threat to the economy, nature and society at large, as such our company commits to act immediately in order to:

- **Achieve net zero emissions before 2050.**
- **Disclose our progress on a yearly basis**.

The involvement and commitment of the Management Team ensures that adequate resources and information are available to maintain the objectives set out in this policy. The team are responsible for reviewing the policy and the Management System annually to ensure that they are current and valid to business and environmental needs.
